PROFILE

Computer Science student with hands-on experience building Python ETL pipelines, SQL databases, and AI-powered tools. Passionate about data engineering and automation. Currently expanding skills in cloud data engineering at Saylani Mass IT Program.

EDUCATION

BS-Computer Science Federal Urdu University of Art Science And Technology	02/2023 – Present Karachi, Pakistan
Pre-Engineering Govt. Islamia Science College, Karachi	01/2021 – 12/2022 Karachi, Pakistan
Matric Islamia English Model School	01/2010 – 01/2020 Karachi, Pakistani

PROJECTS

Web Scraping to SQL Analytics Pipeline 
Designed and implemented an end-to-end data pipeline to extract, transform, and analyze e-commerce data, leveraging Python and SQL to deliver actionable insights from raw web-scraped datasets.
Weather ETL Pipeline — Apache Airflow + Docker 
A hands-on classroom project demonstrating a complete Extract → Transform → Load pipeline using Apache Airflow 2.8 running in Docker. No API keys required.
Snowflake SCD Implementation 
This project implements a real-time data pipeline for continuous data ingestion and transformation into a Snowflake data warehouse. It leverages various cloud technologies to achieve Change Data Capture (CDC) and Slowly Changing Dimensions (SCD) for historical data management.

COURSES

Cloud Data Engineer Saylani Mass IT Program	07/2025 – Present Karachi, Pakistan
Snowflake Badges Snowflake	05/2025 – Present Karachi, Pakistan

SKILLS

Programming & Scripting: Python, SQL	Databases: SQL Server
Data Engineering & Analysis: Data Cleaning, ETL Pipelines, Exploratory Data Analysis (EDA), Data Transformation	Concepts: Web Scraping, Data Modeling, Feature Engineering, Statistical Analysis
Other Tools: GitHub, Kaggle API, VS Code
