PROFILE

Computer Science student with hands-on experience building Python ETL pipelines, SQL databases, and AI-powered tools. Passionate about data engineering and automation. Currently expanding skills in cloud data engineering at Saylani Mass IT Program.

EDUCATION

BS-Computer Science <i>Federal Urdu University of Art Science And Technology</i>	02/2023 – Present Karachi, Pakistan
Pre-Engineering <i>Govt. Islamia Science College, Karachi</i>	01/2021 – 12/2022 Karachi, Pakistan
Matric <i>Islamia English Model School</i>	01/2010 – 01/2020 Karachi, Pakistani

PROJECTS

- End-to-End Data Pipeline for AtliQon Company** 
This project demonstrates a complete enterprise data engineering solution built to consolidate and process sales data from a parent company (AtliQon) and its newly acquired child company (SportsBar) using modern cloud data engineering practices.
- Weather ETL Pipeline — Apache Airflow + Docker** 
A hands-on classroom project demonstrating a complete Extract → Transform → Load pipeline using Apache Airflow 2.8 running in Docker. No API keys required.
- Snowflake SCD Implementation** 
This project implements a real-time data pipeline for continuous data ingestion and transformation into a Snowflake data warehouse. It leverages various cloud technologies to achieve Change Data Capture (CDC) and Slowly Changing Dimensions (SCD) for historical data management.

COURSES

Cloud Data Engineer <i>Saylani Mass IT Program</i>	07/2025 – Present Karachi, Pakistan
Snowflake Badges <i>Snowflake</i>	05/2025 – Present Karachi, Pakistan

SKILLS

Programming & Scripting: Python, SQL	Databases: SQL Server
Data Engineering & Analysis: Data Cleaning, ETL Pipelines, Exploratory Data Analysis (EDA), Data Transformation	Concepts: Web Scraping, Data Modeling, Feature Engineering, Statistical Analysis
Other Tools: GitHub, Kaggle API, VS Code
